

Deployment Status - Audit Logs Finalization

Date: January 5, 2026

Time: 09:35 UTC

Status:  Deployed to GitHub - Awaiting Render Auto-Deploy

Commit Details

Commit Hash: dda7521

Branch: main

Message: feat: Finalize Audit Logs - add nav link, fix UI overlap, enhance search

GitHub URL: <https://github.com/profy7/carelinkai/commit/dda7521>

Changes Summary

1. Navigation Link Added

- **File:** src/components/layout/DashboardLayout.tsx
- **Change:** Added Audit Logs link to sidebar Settings section
- **Access:** Admin only
- **Icon:** FiFileText
- **Location:** Settings > Audit Logs

2. Report Bug Button Repositioned

- **File:** src/components/bug-report/BugReportButton.tsx
- **Change:** Moved from bottom-right to bottom-left
- **Reason:** Avoid overlap with pagination controls
- **Impact:** Improved UX on all pages with pagination

3. Enhanced Search

- **File:** src/app/api/admin/audit-logs/route.ts
 - **Change:** Added user firstName, lastName, and email to search
 - **Impact:** More powerful audit log search capabilities
-

Build Verification

Local Build Test

```
npm run build
```

Result:  Success

- No TypeScript errors
 - No linting errors
 - All routes compiled successfully
 - Build size: Normal
 - Build time: ~2-3 minutes
-

Deployment Status

GitHub Push

-  Pushed to `main` branch
-  Commit `dda7521` visible on GitHub
-  Auto-deploy should trigger on Render

Render Deployment

Expected Timeline: 5-10 minutes

Monitor At: <https://dashboard.render.com/web/srv-d3lsol3uibr73d5fm1g>

Auto-Deploy: Enabled (deploys on commit to main)

Post-Deployment Verification Checklist

1. Deployment Status

- ☐ Check Render dashboard for deployment status
- ☐ Verify build logs show no errors
- ☐ Confirm deployment goes live successfully
- ☐ Check deployment timestamp

2. Navigation Link Test

- ☐ Login as admin user
- ☐ Open sidebar navigation
- ☐ Expand Settings section
- ☐ Verify “Audit Logs” link appears
- ☐ Click link and verify it navigates to `/admin/audit-logs`
- ☐ Verify non-admin users don’t see the link

3. Report Bug Button Test

- ☐ Navigate to Audit Logs page
- ☐ Scroll to view pagination controls
- ☐ Verify Report Bug button is on bottom-left
- ☐ Verify no overlap with pagination “Next” button
- ☐ Test button click opens modal correctly

4. Enhanced Search Test

- [] On Audit Logs page, use search bar
- [] Test search by user first name (e.g., "Admin")
- [] Test search by user last name (e.g., "User")
- [] Test search by email (e.g., "admin@")
- [] Verify results include matching logs
- [] Test existing search fields still work:
- [] Description
- [] Resource ID
- [] IP address

5. Overall System Health

- [] Check for any console errors
- [] Verify no performance degradation
- [] Test other admin pages still work
- [] Verify audit logging still records events

Expected Deployment Timeline

Time	Event	Status
09:35 UTC	Commit pushed to GitHub	✅ Complete
09:36 UTC	Render webhook triggered	⌚ Pending
09:37 UTC	Build started on Render	⌚ Pending
09:40 UTC	Build completed	⌚ Pending
09:41 UTC	Deployment started	⌚ Pending
09:45 UTC	Live on production	⌚ Pending

Troubleshooting

If Deployment Fails

1. **Check Render Build Logs:**
 - Look for build errors
 - Verify environment variables are set
 - Check for missing dependencies
2. **Check Render Deploy Logs:**
 - Look for startup errors

- Verify database connection
- Check for port binding issues

3. Common Issues:

- **Build timeout:** May need to increase build timeout in Render settings
- **Database connection:** Verify DATABASE_URL is correct
- **Environment variables:** Ensure all required env vars are set

If Features Don't Work

1. **Clear browser cache:** Force refresh with Ctrl+Shift+R
2. **Check browser console:** Look for JavaScript errors
3. **Verify deployment:** Ensure latest commit is deployed
4. **Check API responses:** Use browser dev tools Network tab

Rollback Plan

If critical issues arise:

```
# Option 1: Revert commit
git revert dda7521
git push origin main

# Option 2: Restore previous files
git checkout 7771e9f src/components/layout/DashboardLayout.tsx
git checkout 7771e9f src/components/bug-report/BugReportButton.tsx
git checkout 7771e9f src/app/api/admin/audit-logs/route.ts
git commit -m "revert: Rollback Audit Logs finalization"
git push origin main
```

Render will auto-deploy the rollback.

Success Metrics

After deployment, verify:

- ☒ Zero console errors on Audit Logs page
- ☒ Navigation link visible for admins
- ☒ Report Bug button doesn't overlap pagination
- ☒ Search returns results for user names/emails
- ☒ Existing functionality remains intact
- ☒ No performance impact

Documentation

All changes documented in:

- `AUDIT_LOGS_FINALIZATION.md` - Detailed implementation summary

- `AUDIT_LOGS_FINALIZATION.pdf` - PDF version for easy sharing
 - This file - Deployment status and verification
-

Next Steps

1. **Monitor Deployment** (Next 10 minutes):
 - Watch Render dashboard
 - Check build logs
 - Verify successful deployment
 2. **Run Verification Tests** (After deployment):
 - Complete post-deployment checklist
 - Test all three features
 - Verify no regressions
 3. **Mark Feature Complete:**
 - Update project tracking
 - Close related tickets/issues
 - Document lessons learned
 4. **Proceed to Next Feature:**
 - Critical Feature #2: System Health Monitoring
 - Plan implementation
 - Schedule development
-

Contact & Support

Deployment Issue?

- Check Render logs: <https://dashboard.render.com/web/srv-d3lsol3uibr73d5fm1g>
- Review commit: <https://github.com/profy7/carelinkai/commit/dda7521>

Need Help?

- Refer to `AUDIT_LOGS_FINALIZATION.md` for technical details
 - Check rollback plan if critical issues arise
-

Status Summary

Component	Status
Code Changes	✓ Complete
Local Build	✓ Passed
Git Commit	✓ Complete
GitHub Push	✓ Complete
Render Deploy	🕒 In Progress
Verification	🕒 Pending

Overall Status: 🟡 Deployment in progress

Last Updated: January 5, 2026 09:35 UTC

Next Update: After Render deployment completes (estimated 09:45 UTC)
