

Migration Deployment Notes

Migration: Update Homes to ACTIVE Status

What This Does

- Updates all AssistedLivingHome records from DRAFT to ACTIVE
- Enables tour submissions for all homes
- Runs automatically on Render deployment

Deployment Process

1. Code pushed to GitHub ✓
2. Render detects new commit
3. Render runs `npm install`
4. Render runs `npx prisma migrate deploy` (applies migration)
5. Render runs `npm run build`
6. Render deploys new version

Expected Timeline

- Deployment starts: Immediately after push
- Migration runs: During deployment (1-2 minutes)
- Deployment completes: 5-10 minutes total

Verification

After deployment completes:

1. Navigate to any home page
2. Click "Schedule Tour"
3. Complete the form
4. Submit tour request
5. Should see: "Tour Request Submitted!" ✓

Rollback (if needed)

If issues occur, the migration can be reverted:

```
UPDATE "AssistedLivingHome" SET status = 'DRAFT';
```

Migration Safety

- ✓ Idempotent (safe to run multiple times)
- ✓ Only updates DRAFT homes
- ✓ Does not affect ACTIVE homes
- ✓ No data loss
- ✓ Reversible

Migration Details

Migration Name: 20251218162945_update_homes_to_active

Location: prisma/migrations/20251218162945_update_homes_to_active/migration.sql

Type: Data migration (UPDATE statement)

Scope: All AssistedLivingHome records

Expected Results

- **Before Migration:** Homes have status = 'DRAFT'
- **After Migration:** All homes have status = 'ACTIVE'
- **Tour Submissions:** Now enabled for all homes

Monitoring

Watch Render deployment logs for:

```
Running prisma migrate deploy...  
Applying migration `20251218162945_update_homes_to_active`  
Migration applied successfully ✓
```

Contact

If issues arise during deployment:

- Check Render logs for migration errors
- Verify database connection status
- Review migration SQL for syntax errors
