# CareLinkAI – Phase 1 MVP Status Matrix (Aide / Caregiver Marketplace)

| Area | Role | Capability | Status | Notes / Gaps |
|------|------|-----------|--------|--------------|
| Aide signup | Aide | Create account and log in | DONE | Registration supports CARE-GIVER role; email verification flow. API: src/app/api/auth/register/route.ts; UI: /auth/register, /auth/login. |
| Aide profile basics | Aide | Create/edit profile (name, bio, photo) | DONE | Profile edit incl. bio, yearsExperience, hourlyRate, address, photo upload. API: /api/profile, /api/profile/photo; UI: /settings/profile. |
| Aide skills & tags | Aide | Add skills, certifications, experience | DONE | UI: /settings/profile → "Skills & Tags" section with toggles for Specialties, Settings, Care Types (src/app/settings/profile/page.tsx). API: PATCH /api/profile accepts specialties/settings/careTypes and validates against MarketplaceCategory (src/app/api/profile/route.ts). DB: Caregiver.specialties, Caregiver.settings, Caregiver.careTypes (prisma/ |

| Area | Role | Capability | Status | Notes / Gaps |
|------|------|-----------|--------|--------------|
| | | | | schema.prisma). Options loaded from /api/ marketplace/cat-egories; market-place filtering uses these fa-cets. |
| Aide availability | Aide | Set/update availability (days/times) | DONE | AvailabilitySlot model and avail-ability JSON on caregiver; availability check API exists (/api/calendar/ availability). Caregiver-facing UI implemented at /settings/ availability with weekly calendar view, CRUD op-erations via /api/ caregiver/avail-ability, supports recurrence (daily/weekly). |
| Aide documents upload | Aide | Upload certifica-tions (CPR, CNA, etc.) | DONE | Full credentials CRUD with presigned up-load. APIs: /api/ caregiver/cre-dentials, /api/ caregiver/ credentials/up-load-url, /api/ caregiver/ credentials/[id]; UI: /settings/cre-dentials. |
| Aide verification status | Admin | Mark aide as verified / | DONE | Admin-only verification im-plemented. API: |

| Area | Role | Capability | Status | Notes / Gaps |
|------|------|-----------|--------|--------------|
| | | pending / rejected | | PATCH /api/admin/credentials/[id] with { isVerified: boolean } updates Credential.isVerified, verifiedBy, verifiedAt. UI: /admin/aides/[id] lists credentials with Verify/Unverify actions and live status badges. RBAC enforced via require-Any-Role([ADMIN]). |
| Aide search list | Operator | Browse/search list of aides | DONE | Marketplace caregiver list implemented. API: /api/marketplace/caregivers; UI: /marketplace (Caregivers tab/cards). |
| Aide filters | Operator | Filter aides by location, skills, availability | DONE | Filters: q, city/state, radius, rate, experience, specialties, settings, careTypes implemented. Availability-based filtering implemented via availableDate, availableStartTime, availableEndTime query params in /api/marketplace/caregivers; UI con- |

|---|---|---|---|---|
| | | | | trols added to marketplace filters panel. |
| Aide detail view | Operator | View aide profile, skills, docs, availability | DONE | Detail shows photo, bio, rate, experience, specialties, reviews, hire request. Availability calendar (next 7 days) and verified credentials/docs now surfaced on profile. UI: /marketplace/caregivers/[id]. |
| Operator → Aide contact | Operator | Send an initial contact / message to aide | DONE | Messaging system exists (/api/messages, /messages). Marketplace "Message" buttons now deep-link to caregiver conversation via ?userId= query param; mobile view handling added; messaging accessible from both card and detail views. |
| Aide → Operator reply | Aide | Respond to operator (basic 2-way communication) | DONE | Two-way messaging works with SSE notifications. APIs: /api/messages, /api/messages/threads; UI: /messages. |

| Area | Role | Capability | Status | Notes / Gaps |
|---|---|---|---|---|
| Aide visibility control | Aide | Set profile as active/paused in marketplace | DONE | DB: Caregiver.isVisibleIn Marketplace boolean with index (prisma/schema.prisma + migration 20251205173000_add_caregiver_visibility). API: /api/profile exposes and updates isVisibleInMarketplace for CAREGIVER role (src/app/api/profile/route.ts). Marketplace API filters by isVisibleInMarketplace=true (src/app/api/marketplace/caregivers/route.ts). UI: /settings/profile shows "Marketplace Visibility" checkbox for caregivers (src/app/settings/profile/page.tsx). |
| Receive inquiries from families | Aide | Get notified when families submit inquiries | ✅ DONE | Family Lead system implemented. Families can submit inquiries via marketplace aide detail page. Creates Lead record with targetType=AIDE, aideId reference, care context snapshot. API: |

| Area | Role | Capability | Status | Notes / Gaps |
|------|------|-----------|--------|--------------|
| | | | | POST /api/leads. Leads visible to operators in /operator/leads for triage and assignment. Future: Aide-facing lead notifications and responses. |
| Admin aide oversight | Admin | List/search aides; view profiles & status | DONE | Admin console implemented. List: /admin/aides consumes GET /api/admin/caregivers with filters (q, city, state, hasUnverifiedCredentials) and pagination; columns: Name, Email, Location, Credential summary, Created. Detail: /admin/aides/[id] consumes GET /api/admin/caregivers/[id] and shows profile info, location, specialties/settings/careTypes, credential list with verification controls. RBAC enforced (admin-only). |

Legend:

- TODO = not validated / not implemented
- WIP = partially working or needs polish
- DONE = works and meets the Phase 1 definition of done
