CareLinkAI Demo Accounts

Overview

This document lists all demo accounts created by the `seed:demo` script for live walkthroughs with ALFs, agencies, and investors.

Running the Seed Script

```
npm run seed:demo
```

Prerequisites:

- PostgreSQL database running and accessible via `DATABASE_URL`
- Prisma schema migrated to the latest version (`npm run prisma:migrate`)

Demo Accounts

All demo accounts use the same password: **DemoUser123!**

Account Table

Role	Email	Password	Name	Purpose
FAMILY	demo.family@carelinkai.test	DemoUser123!	Jennifer Martinez	Demonstrates family member looking for care for mother with Alzheimer's
OPERATOR	demo.operator@carelinkai.test	DemoUser123!	Michael Chen	Demonstrates lead management and care coordination
CAREGIVER	demo.aide@carelinkai.test	DemoUser123!	Sarah Thompson	Demonstrates aide profile, credentials, and messaging
PROVIDER	demo.provider@carelinkai.test	DemoUser123!	Robert Williams (Golden Years Home Care)	Demonstrates provider profile, services, and inquiries
ADMIN	demo.admin@carelinkai.test	DemoUser123!	Admin User	Demonstrates admin tools for provider/aide verification

Account Details

1. Family Member (Jennifer Martinez)

Email: demo.family@carelinkai.test
Role: FAMILY
Care Context:
- Primary contact for 82-year-old mother
- Mother has early-stage Alzheimer's disease
- Needs 20-25 hours/week of care
- Looking for compassionate, experienced caregiver

Pre-created Data:
- 4 leads (inquiries to aides and providers)
- 5 message threads (with operator, aides, providers)
- Care context profile fully filled out

Key Demo URLs:
- `/settings/family` - Care context and profile
- `/marketplace/aides` - Browse caregivers

- `/marketplace/providers` - Browse providers
- `/favorites` - Saved favorites
- `/messages` - View conversations

---

2. Operator (Michael Chen)

Email: demo.operator@carelinkai.test
Role: OPERATOR
Company: CareLink Services Inc.

Pre-created Data:
- Assigned to 2 leads (IN_REVIEW and CONTACTED status)
- 3 message threads (with family, aides, providers)

Key Demo URLs:
- `/operator/leads` - Lead management dashboard
- `/operator/leads/[id]` - Lead detail view
- `/messages` - Coordinate with families and providers
- `/dashboard` - Overview dashboard

---

3. Aide/Caregiver (Sarah Thompson)

Email: demo.aide@carelinkai.test
Role: CAREGIVER
Experience: 7 years, specializing in Alzheimer's care
Rate: $32/hour

Pre-created Data:
- 1 lead from demo.family (NEW status)
- 2 message threads (with operator and family)
- Complete profile with skills and availability
- Background check: CLEAR

Key Demo URLs:
- `/settings/aide` - Caregiver profile
- `/settings/credentials` - Credentials management
- `/messages` - View inquiries
- `/dashboard` - Overview

---

4. Provider (Robert Williams - Golden Years Home Care)

Email: demo.provider@carelinkai.test
Role: PROVIDER
Business: Golden Years Home Care
Experience: 15 years in business
Services: Personal Care, Companionship, Medication Management, Dementia Care, Respite Care

Pre-created Data:
- 2 leads from demo.family (IN_REVIEW and NEW status)

- 2 message threads (with operator and family)
- Complete provider profile with coverage area and credentials
- Verified status: TRUE

Key Demo URLs:
- `/settings/provider` - Provider profile
- `/settings/credentials` - License and insurance management
- `/messages` - View inquiries
- `/dashboard` - Overview

---

5. Admin (Admin User)

Email: demo.admin@carelinkai.test
Role: ADMIN

Key Demo URLs:
- `/admin/providers` - Provider management and verification
- `/admin/aides` - Caregiver management
- `/dashboard` - Admin dashboard

Additional Test Data

The seed script also creates:

Additional Caregivers (6)

1. **Maria Garcia** - San Jose, CA - Bilingual (English/Spanish), Post-surgery care
2. **James Wilson** - Oakland, CA - Male caregiver, Nursing background
3. **Lisa Anderson** - San Francisco, CA - Hospice and end-of-life care
4. **David Nguyen** - Berkeley, CA - Mobility assistance and fall prevention
5. **Emily Brown** - Palo Alto, CA - Dementia care specialist
6. **Antonio Rodriguez** - Sacramento, CA - Meal preparation and nutrition

Additional Providers (5)

1. **Compassion Home Health** - San Francisco, CA
2. **Senior Helpers of the Bay Area** - San Jose, CA
3. **Home Instead Senior Care** - Oakland, CA
4. **Visiting Angels** - Berkeley, CA
5. **Right at Home Bay Area** - Palo Alto, CA

Pre-created Leads (4)

1. Family → Demo Aide (NEW)
2. Family → Demo Provider (IN_REVIEW, assigned to operator)
3. Family → Maria Garcia (CONTACTED, assigned to operator)
4. Family → Compassion Home Health (NEW)

Pre-created Message Threads (5)

1. Family ↔ Operator (about care needs)

2. Operator ↔ Demo Aide (about a lead)

3. Operator ↔ Provider (about a lead)

4. Family ↔ Demo Aide (direct inquiry)

5. Family ↔ Provider (direct inquiry)

Testing Workflows

Family Flow

1. Login as demo.family@carelinkai.test

2. View care context at `/settings/family`

3. Browse marketplace at `/marketplace/aides` and `/marketplace/providers`

4. Check existing leads and messages

5. Submit a new inquiry

Operator Flow

1. Login as demo.operator@carelinkai.test

2. View leads at `/operator/leads`

3. Open a lead detail page

4. Update lead status and add notes

5. Open conversation with family or provider

Aide Flow

1. Login as demo.aide@carelinkai.test

2. View profile at `/settings/aide`

3. Check credentials at `/settings/credentials`

4. View messages and respond to inquiries

Provider Flow

1. Login as demo.provider@carelinkai.test

2. View profile at `/settings/provider`

3. Check credentials at `/settings/credentials`

4. View messages and respond to inquiries

Admin Flow

1. Login as demo.admin@carelinkai.test

2. View providers at `/admin/providers`

3. Click on a provider to view details

4. Toggle verification status

Notes

- All demo accounts have `emailVerified` set to bypass email verification
- All accounts have `status: ACTIVE`
- Background checks for caregivers are set to `CLEAR`

- Provider verification statuses are set to `TRUE` for verified providers
- Messages have realistic timestamps (spread over the past 3 days)
- Leads have realistic preferred start dates (1-3 weeks in the future)

Troubleshooting

Issue: Seed script fails with "unique constraint" error
Solution: The script uses `upsert` for accounts, so it's safe to run multiple times. Clear the database first if needed:

```
npm run prisma:migrate reset
npm run seed:demo
```

Issue: Can't login after seeding
Solution: Verify password is exactly `DemoUser123!` (case-sensitive, includes exclamation mark)

Issue: No data appears in UI
Solution:
1. Check that seed script completed successfully
2. Verify database connection
3. Clear browser cache and reload
4. Check browser console for errors
