Tour Form - Quick Testing Guide

🚀 IMMEDIATE TEST STEPS

1. Open Production Site

```
https://carelinkai.onrender.com/homes/1
```

2. Open Browser Console

- **Chrome/Edge:** Press `F12` or `Ctrl+Shift+J`
- **Firefox:** Press `F12` or `Ctrl+Shift+K`
- **Safari:** Press `Cmd+Option+C`

3. Start Tour Booking

- Click **"Schedule a Tour"** button in the right sidebar

4. Fill Contact Info

✅ **Correct Way (WILL WORK):**
- Name: Your name
- Email: your@email.com
- **CHECK at least ONE box:**
- [ ] Assisted Living ✅
- [ ] Memory Care
- [ ] Medication Management

❌ **Wrong Way (WILL BLOCK):**
- Name: Your name
- Email: your@email.com
- **Leave ALL boxes unchecked** ← This is the problem!

5. Click "Continue to Schedule Tour"

6. Check Console Output

If you see this → Form is BLOCKED:

```
❌ FORM BLOCKED - FIX VALIDATION ERRORS ABOVE
```

If you see this → Form ADVANCED:

```
✅ FORM ADVANCED - Should show tour scheduling now
```

🔍 WHAT TO LOOK FOR

Error Message on Screen

When form is blocked, you should see:

```
━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━
🚨 Please select at least one care service
━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━
```

- Red background
- Red border around checkboxes
- Alert icon
- Bold text

Success Behavior

After checking a box and clicking button:

- Form should change to show date/time selection
- Step indicator should move to step 2
- Console logs show validation passed

⚡ ONE-MINUTE TEST

```
1. Open site
2. Press F12
3. Click "Schedule a Tour"
4. Fill name + email
5. DON'T check any boxes ← This simulates the bug
6. Click "Continue to Schedule Tour"
7. Should see RED ERROR MESSAGE
8. Check one box
9. Click button again
10. Should advance to date selection
```

🎯 SUCCESS CRITERIA

✅ Fix is working if:
- Error message is VISIBLE and PROMINENT
- Console shows detailed logs
- Form advances after checking a box
- Form blocks when no boxes checked

❌ Issue still exists if:
- No error message appears
- Form doesn't advance even with boxes checked
- Console logs don't appear
- Error message is hard to see

📞 REPORT RESULTS

If working correctly:

- Take screenshot of error message
- Copy console log output
- Test complete tour flow

If still broken:

- Copy ALL console output
- Take screenshot of form state
- Note which step failed
- Check network tab for API errors
